SUPPLEME

25X1X6

- 1. The Garantie & Kreditbank has a capital of 150,000,000 RM which was advanced by the Central Finance Department of SMA (Zentralfinanzverwaltung). This sum is only a beginning and will be increased as required by the increase of exports to the East. It is claimed that the goal for 1947 is 1,000,000,000 RM.
- 2. The Garantie & Kreditbank has two Russian directors, who were formerly connected with the Russian Trade Union Bank. The third director is a German named Remmeisen; his deputy is a German named Fellner.
- 3. As a private German bank, the Garantie & Kreditbank should be under the control of the Central Administration of Finance. In practice, however, no such control is exercised, since the Garantie & Kreditbank serves Russian interests only.
- 4. The Russians get reparations deliveries from German firms through this system of financing. In return, the German firms are offered a safe field of enterprise.
